Region A Directors
Jim & Sue Jackson
jack297@bellsouth.net
(334) 297-1719

If you are interested in filling a staff position in Chapter H, please contact any of the Chapter Staff listed above.

Friends for Fun, Safety and Knowledge, the more you know the better it gets, ride to eat – eat to ride, the best ride ever was the last ride. These are a few phrases we have all heard when describing our membership in GWRRA and in particular, our Chapter. When you break down all these well know phrases, it all boils down to what do I get out of belonging to GWRRA. In short, you get out of it what you put into it. The more you participate, the more fun it is. Your Chapter team tries to schedule activities that will provide the fun you expect from the benefits of belonging to GWRRA. In addition to our monthly gathering where we play games, give away door prizes and best of all, money. We ride to nearby Chapters every month that give us an opportunity to support our sister Chapters and visit with old friends. For those that have the desire to refresh your riding skills and either learn or refresh you CPR/First Aid life saving skills, there are trained instructors within your Chapter that are more than willing to provide that training. You also have trained Leadership Instructors in your Chapter to

provide in depth information about how GWRRA works and what makes GWRRA unique from any other motorcycle organization. If you haven't noticed, the scheduled rides almost always includes eating. That is where the phrase "Ride to Eat – Eat to Ride" comes from. I am sure there are a lot of places we have either not been to or have not gone to in a long time, so if there is a special restaurant you would like to share with your friends, we would love to hear about it. One of our favorites is Yoders in Montezuma. We could always visit a museum, park, or local attraction and of course plan a stop along the way to eat. Do you have a favorite place you like to go? We would love to hear about it. No matter where we ride or what we do, the ride alone will provide us with the best ride ever with friends for Fun, Safety and Knowledge. If you haven't been to a monthly gathering or gone on a ride with us lately, we would love to have you to come join in on the fun and friendship. Ride safe and ride often.
Bill and Betty

Are you ready for the riding season?

I know you have heard us say it lots of times, but we wanted for you to hear it again. The weather will eventually get better and even now there are a few warm days that you get the urge to get on the Wing and go for a ride. You think you might be ready, but are you? Is your bike ready? There are some things we would like for you to consider before heading out on the road. Have you had any medical changes or injuries since your last ride? Aches and pains can play an important part of how we handle a motorcycle, especially in an emergency situation. Injuries can greatly affect or limit our capabilities of handling a motorcycle, especially if we have a co-rider on the back. Are you mentally ready to ride? Is there something on your mind that will distract you from the primary responsibility of riding a motorcycle? We need to be focused on the primary task of riding and not be distracted. Do you have the right clothing? Now that you are physically and mentally ready, is your bike ready? When was the last time you checked the air in the tires or checked the tread depth? Are the tires cupped or a nail or screw in the tires? Even worse, are there any cords showing? There are only two small patches of rubber touching the road when riding, so it is a good idea to check your tires often. We recommend checking the pressure before every ride and check for wear and foreign objects at least once a week. Also check your valve stems for leaks. What about the fluids? When was the last time you checked your oil level or had your oil changed? And don't forget about the coolant, clutch, brake and rear drive fluids. You need to refer to your owners manual for the proper maintenance schedule for your particular bike to ensure the correct intervals and fluid types are used. Lights cables and controls should also be checked to ensure proper operation. We don't want to discourage you to get out and ride by providing these suggestions, but we want to make sure you are prepared before you do.

Birthdays in March

Betty Livingston Mar 19th

Anniversaries in March

Rich and Marilyn Morgan Mar 9th

Up Coming Rides and Activities

Mar 7th and 8th - Chapter O Safety Break - Leave Big E's at 9:00
